**Teaching Assistant**
Max Jativa, Graduate Student
Office
CIRS 4342
Office Hours
Tuesday 1-2pm
Email
mjativa@psych.ubc.ca

About

In this course, you will take a closer look at psychological science. Here, we focus on cognition, namely, the scientific study of the mind. Cognition includes sensation and perception, consciousness, language, memory, learning and thinking. We will cover these topics by examining behavioural and neural phenomena. We will also discuss alterations in cognitive processes in clinical populations.

Format

Lectures will be based on textbook content and beyond. The latter includes additional relevant content (e.g., hot topics in the field), other reading material (e.g., journal articles), or occasional video clips. Hence students should attend lectures to access all of the course content.
Materials

**Required Textbook**
Cognitive Psychology: Connecting Mind, Research, and Everyday Experience
5th Edition (E. Bruce Goldstein); Electronic, binder ready, or hard copy is fine.

**Required Reading**

Communication

**Website**
Lecture slides, assignments, and grades are available on UBC Canvas.

**Email**
The best way to get in touch with Daniela or Max is through our UBC e-mails (include “PSY309A” in the subject line). Please check for the information in the syllabus first.

Assessment

**Midterm (30%) and Final Exam (40%)**
The midterm/final exam is based on material from the textbook, lectures, supplementary readings, and videos. The format is multiple-choice, shorter and longer questions and diagrams. The final exam is cumulative with slightly more emphasis on material covered post midterm (40% pre-midterm, 60% post-midterm material).

**Short Paper (30%)**
The short paper involves a 1200-word essay, critiquing an article assigned to you (see assignment outline when available).

**Extra Credit (3%)**
One way to learn more about psychology is to be a participant in ongoing research projects. You may earn up to 3 credits toward your course grade by participating in studies that are posted on https://ubc-psych.sona-systems.com. Please register in this online system by end of the first month of class. You can also earn your first half hour of credit by completing pretesting survey that will make you eligible for a wider variety of studies. Please note that in a given term, you can earn no more than one hour of credit for online studies (not including the pretesting). As an alternative to participating in studies, you
may choose to complete library writing projects, in which you read and summarize a research article; each article summary counts as one hour of research participation. More information about this option can be found at: http://www.psych.ubc.ca/resguide.psy. All of your credits for study participation or the library option will be added to your final course grade, after any scaling that may have been applied.

Access and Diversity

UBC is committed to equal opportunity for all of its students including those with documented physical or learning disabilities. If you have a disability that affects your learning or performance in class, including exam writing, please visit: http://students.ubc.ca/about/access.

Policies

Attendance and Class Etiquette

Although we do not take attendance in this class, you are strongly encouraged to attend every lecture to achieve the highest grade possible. Class participation is strongly encouraged but not mandatory. While you are in class, you are permitted to use your laptop or iPad for course-related activities (e.g., taking notes). We discourage you from using your laptop (or other devices) for non-course activities as this may be a distraction to your classmates. If you decide to do so, however, please try to sit at the back of the room.

Grading

In order to avoid grade inflation and maintain equity across course sections, all psychology courses must comply with departmental grade norms: The average grade in a 300- and 400-level Psychology course is 70 for an exceptionally strong class, 68 for an average class, and 66 for a weak class. Scaling (either up or down) may be required to comply with these norms.

Disputing a Grade

Any complaint about the midterm or paper should be made in writing to Max and myself and should detail the point of contention. All complaints should be made within 1 week of receiving your grade.

Late Assignment

There is a 10% penalty per day for lateness and the paper will not be accepted if it is more than one week late. (e.g., if it is due on a Tuesday, the last day it will be accepted is the following Tuesday).

Missing the Midterm/Exam

For scheduled UBC-sanctioned sport travel or a religious obligation that conflicts with the midterm/exam, please contact us within the first 2 weeks of classes to ensure alternative arrangements are made. If a medical issue arises, and you must miss the midterm/exam, you must contact me before the midterm/exam and provide medical documentation within 1 week of the midterm/exam. You are
responsible for scheduling a makeup exam within 1 week of the original exam date (unless your documentation suggests a longer period is required). If you miss the midterm/exam without a legitimate excuse, you will receive a mark of zero.

Psychology Department’s Position on Academic Misconduct
Cheating, plagiarism, and other forms of academic misconduct are very serious concerns of the University, and the Department of Psychology has taken steps to alleviate them. In the first place, the Department has implemented software that can reliably detect cheating on multiple-choice exams by analyzing the patterns of students’ responses. In addition, the Department subscribes to TurnItIn – a service designed to detect and deter plagiarism. All materials (term papers, etc.) that students submit for grading will be scanned and compared to over 4.5 billion pages of content located on the Internet or in TurnItIn’s own proprietary databases. The results of these comparisons are compiled into customized “Originality Reports” containing several sensitive measures of plagiarism; instructors receive copies of these reports for every student in their class.

In all cases of suspected academic misconduct, the parties involved will be pursued to the fullest extent dictated by the guidelines of the University. Strong evidence of cheating or plagiarism may result in a zero credit for the work in question. According to the University Act (section 61), the President of UBC has the right to impose harsher penalties including (but not limited to) a failing grade for the course, suspension from the University, cancellation of scholarships, or a notation added to a student’s transcript.

All graded work in this course, unless otherwise specified, is to be original work done independently by individuals. If you have any questions as to whether or not what you are doing is even a borderline case of academic misconduct, please consult your instructor. For details on pertinent University policies and procedures, please see Chapter 5 in the UBC Calendar (http://students.ubc.ca/calendar) and read the University’s Policy 69 (available at http://www.universitycounsel.ubc.ca/policies/policy69.html).

Resources

- **UBC Wellness Centre** (604-822-8450): students.ubc.ca/livewell/services/wellness-centre
  Speak with other students about how to manage stress, healthy sleep and eating, safe sex, etc.
- **BC Crisis Center** (604-872-3311): crisiscentre.bc.ca
  Non-profit, volunteer-driven organization that provides 24/7 emotional support for those in crisis in BC.
- **Counselling Services** (604-822-3811): students.ubc.ca/livewell/services/counselling-services
  Offers resources to help you maintain mental health while in school.
